a journal of physics

Volume 22, January–June 1984

CONTENTS

Atomic Physics

Level-degeneracy effects in resonant nonlinear phenomena: Three-level atomic model ..... *Govind P Agrawal* 293–301

Instrumentation and Experimental Techniques

Aberration-corrected catadioptric magnifiers useful for simple microfiche readers ..... *M V R K Murty, N C Das and R P Shukla* 213–220

Dynamic calibration of shock overpressure transducers. ..... *J Harvey, J Nandakumar and L V Krishnan* 447–452

Gas pressure regulation in a r.f. ion source ..... *S S Jayantha Kumar, V K Chindhade and V N Bhoraskar* 453–456

Automation of the direct current comparator resistance bridge. ..... *R Aidun, R Caton and Sigurds Arajs* 567–572

Frequency stability and reproducibility of iodine stabilised He-Ne laser of 633 nm ..... *V D Dandawate and Kowsalya* 573–578

Letter

Use of pseudopotential towards time-evolution of a non-stationary state: Spatially localized excitation in a crystal ..... *Sambhu N Datta* L125–L130

Liquids

Structure study of simple fluids ..... *B B Deo and A C Naik* 467–477

Partial structures and compressibilities of ions in fused potassium bromide ..... *R V Gopala Rao and Sobhen Kumar Pal* 523–532

Molecular Physics

True potential energy curves, *r*-centroids and Franck-Condon factors of a few transition metal diatomic molecules ..... *M V Ramanaiah and S V J Lakshman* 11–16

$\pi^* \leftarrow \pi$ electronic transition in hydroxy-benzonitriles, I. Orthohydroxybenzonitrile ..... *S Ram, J S Yadav and H D Bist* 17–30

On the calculation of second order properties: An equation of motion approach ..... *M Gupta and S Bhattacharyya* 579–587

Nuclear Physics

Nuclear compressibility and its effect on nuclear binding energies from the study of muonic atoms..... *K V Subba Rao and A A Kamal* 71–78

Energy dependence of photon-induced L shell x-ray intensity ratios in Ta and W..... *K Shatendra, K L Allawadhi and B S Sood* 79–88

Measurement of L-shell photoelectric cross-sections in lower intermediate Z elements at 6 keV ..... *N Singh, R Mittal, K L Allawadhi and B S Sood* 89–92

Longitudinal plasma waves in the presence of monopoles of electron mass and electron charge ..... *V H Kulkarni and V V Bhokare* 93–96

Colour dielectric model of the photon..... *P K Jena and T Pradhan* 97–106

Fusion-fission angular distributions: A new probe of fast fission fractionation in nucleus-nucleus collisions ..... *S S Kapoor, V S Ramamurthy and R Ramanna* 275–282

Study of pulsed fast neutrons in an infinite iron assembly..... *Pinky Batheja, Feroz Ahmed and L S Kothari* 283–292

Pion absorption by ^{16}O using realistic interactions—II: Free pion absorption followed by emission of proton ..... *U N L Mathur and Y R Waghmare* 457–466

Deuteron form factors and tensor force.... *S S Mehdi and V K Gupta* 497–511

Muon capture by ^{16}O—using a microscopic theory of particle-hole states ..... *V N Sridhar, R Parthasarathy and Y R Waghmare* 513–522

Optics

Oscillator models for multiphoton optical bistability and phase conjugacy ..... *G S Agrawal* 303–312

Particle Physics

Mass spectrum of the dimuons produced in relativistic heavy-ion collisions ..... *D Syam* 31–42

Dispersion theory relations and charmed baryons couplings..... *V P Seth, V K Jain and S D Pabbi* 43–48

Complete mass spectra of $q\bar{q}$ and $Q\bar{q}$ mesons with improved Bethe-Salpeter dynamics of confinement ... *A N Mitra and Anuradha Mittal* 221–236

A new approach to particle confinement .... *P K Jena and T Pradhan* 237–246

Baryon number violating nuclear decay ..... *C S Warke* 247–256

A study of pion absorption by ^{16}O using realistic interactions—I. Two-nucleon emission following bound-pion absorption ..... *U N L Mathur and Y R Waghmare* 257–274

Meson spectra with a power-law potential in the Dirac equation ..... *G S Sharma and L K Sharma* 533–537

Quark potentials for mesons in the Klein–Gordon equation ..... *L K Sharma and G S Sharma* 539–547

Quantum Mechanics

Fluctuations in SU(2) Yang-Mills theory ..... *K Babu Joseph and B V Baby* 111–116

Continuum bound state and transition matrix of the scattering wave function for projected Yamaguchi potential ..... *D K Ghosh* 117–124

Relativistic particle interactions—A comparison of independent and collective variable models ..... *J Samuel and N Mukunda* 131–150

Thermodynamic and magnetic properties of the electron gas in the inhomogeneous magnetic field Hr^{-1} ... *P Achuthan and K Venkatesan* 479–488

On the quantisation of dissipative systems ..... *M C Valsakumar* 489–496

Relativity and Cosmology

Kerr metric in the deSitter background ..... *P C Vaidya* 151–158

Neutrinos in gravitational collapse: Analysis of the flux profile ..... *S V Dhurandhar and C V Vishveshwara* 159–172

Solid State Physics

Transport properties and thermal studies on pure and Cu^{2+}-doped potassium hydrogen maleate single crystals ..... *A D Reddy, S G Sathyanarayan and G S Sastry* 49–56

Mössbauer effect investigations of FeZn alloy and analysis using charge shift model ..... *H C Verma* 57–62

Thermal conduction in a homogeneous two-phase system ..... *R N Pande, V Kumar and D R Chaudhary* 63–70

Local field distribution revisited in the light of percolation model of spin glass transition ..... *A Mookerjee and D Chowdhury* 107–110

Thermal neutron polarisation . *N S Satya Murthy and L Madhav Rao* 313–328

Studies on the valence state of Ce and Eu in some new boron and silicon containing rare earth intermetallic compounds ..... *S K Malik, S K Dhar and R Vijayaraghavan* 329–344

The crystal field in α-alums—A high pressure magnetic resonance study ..... *Shantanu Sinha and R Srinivasan* 345–364

Density wave theory of freezing and the solid ..... *T V Ramakrishnan* 365–376

On the possible origins of natural diamonds ..... *A R Patel and Kuruvilla A Cherian* 377–386

Superconducting transition temperature of a paramagnetic material close to magnetic ordering ..... *Ranjan Chaudhury and Sudhanshu S Jha* 431–438

Some puzzles in the results of ultrasonic attenuation in superconductors ..... *B K Basu* 439–446

Reanalysis of polarised neutron data on NiRu using projection operator formalism ..... *R Chakravarthy and L Madhav Rao* 549–557

The temperature dependence of dielectric constant of crystals with fluorite structure ..... *Lalitha Sirdeshmukh and Y R Reddy* 559–565

Spectroscopy

Laser excited fluorescence of Na_2 ..... *K S Chandrasekhar, S D Sharma, T K Balasubramanian, R D'Souza and R Bhatnagar* 3–10

Statistical Physics

Nonlinear response theory—I ..... *Sudhanshu S Jha* 173–182

Perturbation expansions and series acceleration procedures: Part I. Convergence and critical parameters ..... *M V Sangaranarayanan and S K Rangarajan* 183–202

Some features of the perturbing effects of gravity near the gas liquid critical point ..... *S Chatterjee, V Vani and E S R Gopal* 203–212

Phase transitions of a feedback amplifier ..... *K Neelakantan and G Venkataraman* 387–406

Perturbation expansions and series acceleration procedures: Part II. Extrapolation techniques *M V Sangaranarayanan and S K Rangarajan* 407–420

Magnetization and susceptibility of disordered alloy with competitive interactions ..... *S K Ghatak* 421–430
